Concernant le point V.

- 1.1 US-A-1 652 936, considéré comme le meilleur état de la technique, décrit un dispositif adapté pour la présentation d'une gamme d'objets tel que celui du préambule de la revendication 1.

Le problème résolu par l'invention était de créer un dispositif de présentation d'objets facilement adaptable à toutes circonstances et non limité à des positions d'utilisation proches de la verticale.

Pour résoudre ce problème, le dispositif de présentation de l'invention comprend des moyens de blocage qui sont adaptés pour bloquer le pied de soutien par rapport au présentoir dans au moins une deuxième position inclinée distincte de la première position inclinée, le dispositif étant adapté pour se tenir de façon stable, dans la deuxième position inclinée, uniquement par appui simultané du pied de soutien et de l'extrémité inférieure dudit présentoir sur une surface d'appui, et en ce que ledit pied de soutien est disposé pour se trouver entièrement sous le présentoir entre la première et la deuxième position inclinée.

Ces caractéristiques sont nouvelles et l'homme de l'art ne peut pas les dériver d'une façon évidente des documents cités afin de résoudre le problème énoncé ci-dessus.

- 1.2 Pour les raisons ci-dessus, le sujet de la revendication 1 et de ses revendications dépendantes 2-13 satisfait aux exigences des articles 33(2) et (3) PCT.
- 1.3 L'application industrielle de l'objet de l'invention est évidente (Article 33(4) PCT).

Concernant le point VIII.

- 1 Le meilleur état de la technique (US-A-1 652 936) aurait du être mentionné dans la description (Règle 5.1(a)(ii) PCT).
